

## CEDAR HILL AFTERSCHOOL PROGRAM AND COMPUTER LAB

BRO. JASON MUHLENKAMP

The Cedar Hill Afterschool Program and Computer Lab is an afterschool program that helps students with their homework, provides computer access, recreation, snacks, and shares the Good News of Jesus Christ. The program provides a safe, learning environment targeted towards low-income children in the housing projects. It is one of the needs identified by the Family Connections collaborative. We are currently located in a building provided by the Blakely Housing Authority. Our hope is to expand the program.

We started the program in late January and it has been a learning process. We get between 5-10 elementary age children to attend the program. We are working with the school on transportation to expand next school year. We have 5 computers. We have shared the story of Holy Week and Easter with the children. We have seen children excited about their test scores and grades. We have provided a positive environment with Christian values.

Thanks for your support of this program.

Peace and God Bless,  
Brother Jason
